GEMINI

Gemini Custody®

Institutional-grade crypto storage. Industry-leading security.

Gemini Custody® is a segregated custody solution providing uncompromising security and compliance to store and manage your digital assets. Gemini is a fiduciary and qualified custodian under New York Banking Law and is licensed by the State of New York to custody digital assets. Gemini Custody® is regularly audited and subject to the capital reserve requirements and compliance standards of a traditional financial institution.

- Custom-built by technical experts in cryptography, finance, and security
- Dedicated account representatives and 24/7 global support.
- Assets held in segregated auditable addresses
- $75 Million in Custody Insurance Coverage
- Same day withdrawals and Instant Trade capability
- Flexible Pricing with free setup and no minimums

Built with the highest security standards

Multi-signature Technology

Gemini's offline storage systems use multi-signature technology, role-based governance protocols, and multiple layers of biometric access controls and physical security to safeguard customer assets. Allow-listing requirement and customizable approval processes for withdrawals enhances account-level security.

Hardware Security Modules (HSMs)

The hardware security modules (HSMs) storing private keys are never connected to the internet, and are kept air-gapped inside safes in locked cages. Gemini's HSMs have achieved the highest levels of the U.S. government's security ratings. HSMs are stored in 24/7 access-controlled secured facilities that are geographically distributed.

Exclusive Account Features:

Role based Permissioning	Clients can select from various user roles on the platform. Through multi-user account model, no single person can be initiator and approver at the same time
Gemini Instant Trade™	With the Gemini Instant Trade™ feature, clients can trade directly on Gemini Exchange with assets held in Gemini Custody®: Gemini instantly credits withdrawals to exchange accounts for buying and selling activity without any delay while maintaining the highest security and verifications standards around funds movement
Allow-listing	As an additional self-service security feature, clients can add approved addresses to their Gemini Custody® account to ensure that cryptocurrency in their account can only be withdrawn to pre-approved addresses
API withdrawals	APIs are supported for withdrawals, account audits and reporting
Sub-accounting	Create and manage multiple accounts with unique crypto addresses and balances under a single master account. Give auditors view-only access into balances, transactions, and activity.

Supported digital assets

Gemini Custody® supports 135+ tokens including the cryptos available for trading on the Gemini Exchange.
